Battery Charger-Discharge Rectifiers Series

General Specifications

- Discharge – Charge
- Manual / Automatic Operation
- PC Software and Test Reporting
- LCD Display Panel
- Warning Indicators
- Discharge – Charge operation in the same product

Options

- Discharge – Charge
- Manual / Automatic Operation
- PC Software and Test Reporting
- LCD Display Panel
- Warning Indicators
- Discharge – Charge operation in the same product

Technical Specifications

- Input Voltage: 380VAC 50Hz or 220VAC 50Hz
- Battery Voltage: 2, 6, 12, 24, 48VDC etc.
- Operation Current: 0-2000A (Customized solution in any current capacity regarding to requested output power)
- Loading Type: Resistive
- Operation Feature: Full Automatic
- Operation Type: Discharge, Charge or Charge-Discharge
- Cooling: Thermostatic Controlled Fan Cooling
- Protections: Over Current, Over Temperature, Over Voltage
- Control: Local Control Panel or Remote Control Unit
